

5 P's

FOR REPEATABLE BREAKTHROUGH RESULTS FOR YOUR BUSINESS

The Five P System includes 23 steps, working through 5 core areas, to complete a “lap.”

After each lap, your business becomes a better managed company — increasing accountability and creating a plan for the future that everyone understands and believes.

Does the System work?

Through license agreements, the **Five P System** is being utilized by an international sales training company, a statewide CPA organization, and local CPA firms.

It is also being considered by several educational programs.

Why? Because they have all seen its effectiveness.

How do I get started?

The first step is to complete the **Five P Business Assessment Survey** with your advisor.

This gives us the diagnosis and tells us where the **Five P System** can improve your business.

To get started, simply arrange an initial consultation.

How long does it take to complete a lap in the Five P System?

That is up to you and your team. It won't help to rush through it, but plan on 4 to 6 half day sessions with your advisor and team to complete a lap. Once finished, you and your team can assess the progress and start in again on parts of the **System** as needed — with an advisor or on your own.
